

# Peer-graded Assignment: R Markdown and Leaflet

Even though your assignment is due on May 3, 11:59 AM PKT, try to submit it 1 or 2 days early if you can. Submitting early gives you a better chance of getting the peer reviews you need in time.

## Instructions

Create a web page using R Markdown that features a map created with Leaflet.

Host your webpage on either GitHub Pages, RPubS, or NeoCities.

Your webpage must contain the date that you created the document, and it must contain a map created with Leaflet. We would love to see you show off your creativity!

## **Review criteria**

The rubric contains the following two questions:

1. Does the web page feature a date and is this date less than two months before the date that you're grading this assignment?
2. Does the web page feature an interactive map that appears to have been created with Leaflet?

## **Example Submissions**

[Here](#)'s an extremely minimal passing example, but we hope your submission is much cooler!
